About us

It is our company's vision to be a worldwide chemical floor systems manufacturer and service provider, adding value to our country.

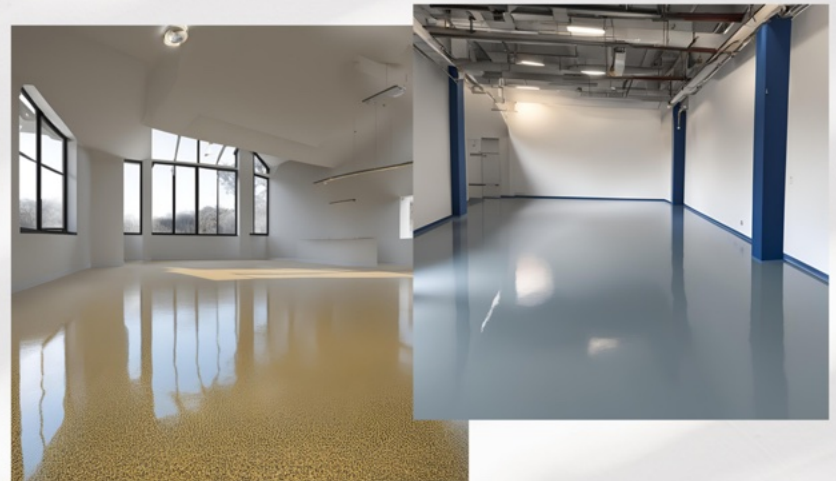

RESIN flooring systems

AB Constructions epoxy, uses different types of service-oriented resins used in a wide variety of civil engineering fields.

Our Vision

It is our company's vision to be a worldwide chemical floor systems manufacturer and service provider, adding value to our country.

Our Mission

Our mission is to be a company that analyses the needs perfectly in all polymer-focused products and meets them in the shortest time with the most affordable cost.

Our Policy Sustainability

For our future generations

We serve the ideology of a more liveable World for our future generations without compromising quality. our Disposing service of all materials and chemicals used in production in a nature- friendly manner and within the framework of zero waste policy is the main source of our sustainability policy.

Our Quality Policy

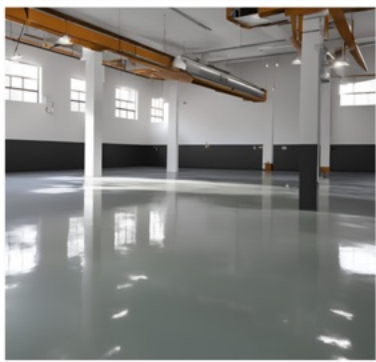

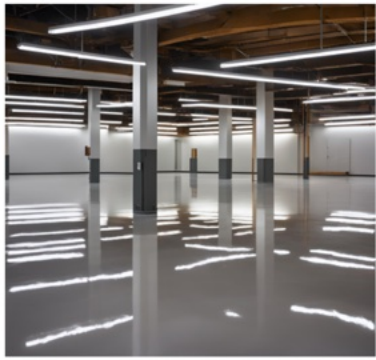

Polymer technologies

Thanks to our extensive knowledge and experience, we offer high quality techniques using all new generation resin based polymer technologies. All the products we use meet quality standards such as ASTM, EN, DIN, ISO and TSE.

Truth Policy

Polymer technologies

We act truthfully, honestly and decisively in our professional work and personal life in all areas of life. When we must make difficult decisions, we have adopted the right and objective decision- making mechanism within the framework of the values we believe in, regardless of the cost.

Epoxy Floor Coating Advantages

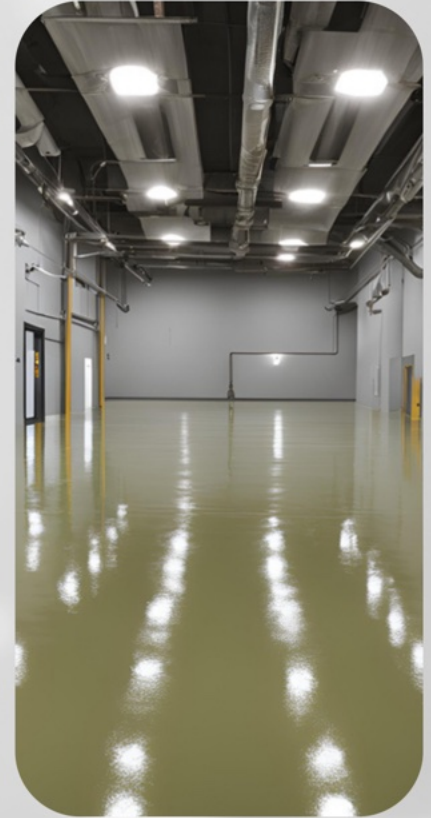

- Creates a hygienic environment by obtaining a jointless monolithic surface with its monolithic application.
- It has a long service life.
- Resistant to thermal shocks.
- High corrosion resistance.
- Resistant to chemicals.
- Excellent penetration and adherence properties.
- Increases the strength of concrete and extends its durability.
- It has high abrasion and impact resistance,
- Liquid proof.
- Creating conductive environments antistatic option

HYGIENIC

LIQUID PROOF

Epoxy Coating Types

1- SELF LEVELING EPOXY FLOOR

It is a type of self-levelling epoxy coating. It can be applied quickly and effectively in large areas. It has a wide choice of colours.

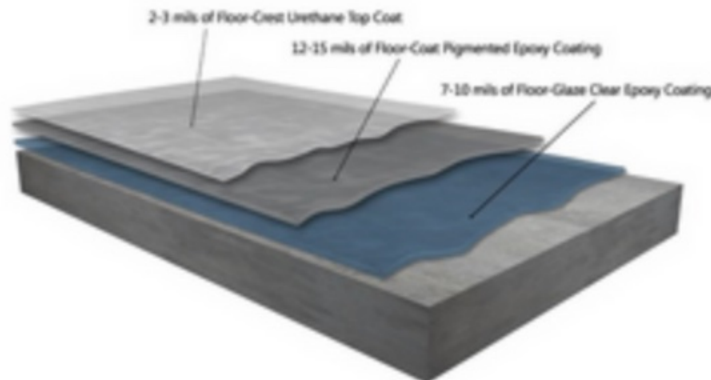

2- TRANSPARENT EPOXY FLOOR COATING

Transparent epoxy floor covering, which is a highly durable and decorative material, is preferred especially in homes and promotion offices. It can be applied under the coating by applying digital printing or by applying a white intermediate

3- ORANGE PEEL TEXTURE EPOXY FLOOR

In the final coat application, the surface is provided with a rough structure with special roll materials, so that non-slip and dust-free floors can be obtained. It is preferred in areas such as factories, workshops and warehouses.

4- MULTILAYER EPOXY FLOOR

It is especially preferred for hard and durable floors with very heavy load and vehicle circulation. It is preferred in areas such as hangars, garages, warehouses and factories. It consists of 7-10 mm thick polished primer, 12-15 mm thick pigment dyed intermediate layer and 2-3 mm polyurethane final varnish layer.

5- MARBLE PATTERNED EPOXY

Marble patterned epoxy floor covering, which our company is most assertive in Turkey, brings the nobility and aesthetics of marble, which has been used in palaces for centuries, to your spaces. Marble-patterned epoxy, free from all the disadvantages of marble coating, is a material that is as strong as marble.

6- Stamp Application Concrete

Our company, which is an expert in floor applications, also offers stamped concrete services. Pressed concrete consists of the process of giving a pattern by mechanical pressing on the ordinary screed application and polishing it after painting and marking.

Prices

	Material	Materials + implementation
Small sized places	65 \$ /mt.sq.	80 \$ /mt.sq.
More than 1000 sq. mt. places	65 \$ /mt.sq.	75 \$ /mt.sq.
+50,000 sq. mt. places	Contact Us	Contact Us
